

The Office of Provider Development focuses on developing and sustaining a qualified community of providers in Virginia so that people who have developmental disabilities and their families have choice and access to options that meet their needs. Provider Development provides information on becoming a provider, information about Virginia's Person-Centered ISP, who to contact for technical assistance, and various training resources.

Visit the [Office of Provider Network Supports](#) for more information.

The Office of Provider Development also maintains the DBHDS Division Developmental Services Provider Network, otherwise known as the 'DDS Listserv'. This Listserv provides DDS updates to providers of IDD Services in Virginia by sending out DBHDS updates via email. [Click here](#) to join the DDS Listserv.
